## **Continuation Sheet (PTOL-303)**

Application No.

Continuation of 3. NOTE: The amended claims require further consideration and possibly further search. The scope of the storing has been altered because, as amended, the storing must be automatic in response to the occurrence of a plurality of events. Therefore the amended claims will not be entered at the present time.

Continuation of 11. does NOT place the application in condition for allowance because: Regarding Applicant's argument that Krause does not teach storing a plurality of states associated with the document upon the occurrence of a plurality of events, the Examiner respectfully disagrees. The Examiner believes Krause's teaching of a the user selecting a button is an "event" under the broadest reasonable interpretation of this claimed term. Each type of button press is a unique event. Thus, the Examiner believes Krause clearly teaches a plurality of claimed events. Thus, a plurality of states are stored in response to the claimed occurrence of the plurality of events.

Continuation of 13. Other: The Examienr has not considered Applicant's arguments in pages 13-15 which are directed to the amended claim limitation of "automatically storing".
